

High-Gloss white 80g

Description

A white, cast coated, high gloss finished, woodfree printing paper.

Basis Weight 80 g/m²

Liner

BG40 brown, supercalendered glassine paper.

Adhesive

A general purpose permanent, rubber based adhesive.

Performance Data

Min. Application Temp.: 0°C

Service Temperature: -40°C to 70°C

Adhesive Performance

The adhesive features excellent tack and adhesion on a wide variety of substrates, including apolar, slightly rough and curved substrates. Particularly good performance at lower temperatures, e.g. labeling of chilled products.

Shelf Life

To obtain optimal performance, use this product within two years of the date of manufacture, under storage conditions as defined by FINAT (20-25°C; 40-50%RH). Prolonged storage outside these conditions might reduce the shelf life.

Applications and Use

Wide range of labels and stickers where very good multicolour print quality with high gloss levels is required. The product is not recommended for mandrel applications e.i. on curved, uneven and cylindrical substrates.

These results are based on tests carried out by our suppliers and our own experience. Etiqueta.es cannot give any guarantee for the optimal adhesion of the materials. Etiqueta.es assumes that the customer checks the suitability of the materials, meets his needs and decides for the right material that meets his requirements. The labels should be stored in a dryplace, at an ambient temperature of between 20° - 24 °C and protected from the effects of the weather, such as sun, rain or snow. The adhesive reacts very quickly, especially to the effects of weathering.

FSC®-Certified*

*Look for FSC®-certified products.

Can be overwritten and stamped

NORIS stamping ink #191 is recommended. Ink dries in about 30 seconds.

Suitable for thermal printing

Check the adaptation of the machine.
