

White Bopp (PET liner)

Spec# B7655

Description

A cavitated, biaxially-oriented polypropylene film with good opacity and a bright white pearlescent appearance. The TC-2000 topcoat provides excellent printability and the facstock offers excellent moisture resistance.

Suitable for UV inkjet, UV letterpress, flexographic UV, solvent and water-based inks.

Caliper/Thickness 2.4 mil / 0.00236 inches $\pm 10\%$

Liner

A durable 1.2 mil polyester liner designed for roll-to-roll, high-speed diecutting and dispensing applications.

Adhesive

Fasson® S7000ER is a clear, general-purpose permanent acrylic adhesive designed for strong adhesion to low surface-energy substrates. It provides excellent wet-out characteristics, water-whitening resistance and good short-term repositionability.

Performance Data

Min. Application Temperature: +25°F (-4°C)

Service Temperature Range: -40°F to +175°F
(subject to facstock limitations)

Adhesive Performance

Suitable for rigid and squeezable containers and designed to provide lasting adhesion on low surface-energy substrates.

Recycling

S7000ER features AD CleanFlake™ Technology to support the recycling of PET and HDPE plastic bottles and containers.

FDA Compliance

Fasson® S7000ER complies with FDA 21 CFR 175.105 for indirect food contact.

Printing Note

Use caution when printing inks or varnishes to the edge of the label. High-shrinkage coatings may cause the label to lift from the liner or substrate.

Optimal Storage Conditions

Ideally store at 72°F and 50% RH.
